fluid end technology

ValTek Fluid End

COMPREHENSIVE FLUID END SUPPORT:

From supporting a preventative maintenance schedule, to fulfilling the inspection, service, repair and aftermarket parts needs of your fleet, ValTek is equipped to enhance the health and longevity of your fluid ends. Our team will design a customized plan to eliminate nonproductive time and provide a faster, safer and cleaner method for servicing your fluid ends.

ValTek's latest fluid end technology for hydraulic fracturing applications was driven by customer feedback. The technology provides high performance and reliability at a cost-effective investment. The newly-designed fluid end is delivered to the customer fully-loaded with parts, bringing enhanced ease of maintenance to customers.

Coupled with our premier line of consumables, the new fluid end achieves maximum life by reducing stress and wear. ValTek's strong and longstanding local Permian footprint positions us to respond quickly to unique customer needs. The evolution of this latest product design features customizations incorporated based on requests shared directly from the customer.

FEATURES:

- Features an enhanced design for high performance and reliability utilizing advanced stainless-steel metallurgy
- Utilizes industry available tools, bringing ease of maintenance to customers
- Ratchet style packing nut locks for enhanced safety
- Efficient Permian-based service and repair expertise
- Delivered fully-loaded with parts for ease of maintenance
- Designed for Optimal Flexibility
 - Available in 4, 4.5 and 5-inch configurations
 - Compatible with most 52 or 60-in quintuplex power ends
 - Works as a direct replacement for most competitor fluid ends
 - Compatible with ValTek and competitor parts and consumables
